

Rahnama Holding Company – Comprehensive Marine Business & Services Hub

April 6, 2025

 Subject:

Request for Allocation and Lease of Space No. 1 (Model 11 – Unit with 15 Offices) in Dubai Maritime City, for Establishment of a Comprehensive Marine Business & Training Centre

Dear Dubai Maritime City Authority,

This letter is to formally request the allocation and lease of Space No. 1 (Model 11 – Unit with 15 offices) located within Dubai Maritime City, for the purpose of establishing a comprehensive marine business and services hub, which will include dedicated departments for maritime operations, training, licensing, logistics, and industrial support services.

As part of our expansion strategy, Rahnama Holding Company, with over two decades of experience in the maritime industry, including shipbuilding, vessel sales, repair services, and marine engineering, aims to establish a centralised facility that brings together all essential maritime-related businesses under one roof. Our mission is to create an integrated ecosystem where professionals, companies, and seafarers can access a full range of services — from vessel registration to technical documentation , crew training , legal compliance , and even industrial bakery provisions for workers and crews.

We have recently launched a dedicated digital platform for marine operations, vessel management, and licensing, which already supports clients across the UAE, GCC, Africa, and Asia. However, to further enhance trust, accessibility, and service delivery, we are seeking to establish a physical presence within DMC, where clients can access face-to-face support, submit documents, and benefit from localised assistance.

 Vision for the Marine Business Hub:

Our objective is to set up a Marine Business Centre that includes:

Vessel Sales & Chartering	Sale and charter of yachts, cargo boats, and supply vessels
Marine Insurance	Hull & Machinery, P&I Club, Liability, and Cargo Insurance
Classification & Survey Booking	Class notations, periodic surveys, and compliance documentation

Flag Registration & Licensing	International flagging (Poland, Liberia, Bahamas), MMSI, documentation
Vessel Management & Manning	Crew recruitment, maintenance, and operational support
Repair & Docking Coordination	Dry-docking, overhaul planning, and survey booking
Offshore Project Support	Engineering, logistics, and equipment for offshore projects
Legal Consultancy	Maritime law, contracts, and dispute resolution
Spare Parts & Equipment Supply	Marine spare parts, tools, and technical supplies
Logistics & Shipping Contracts	Heavy Equipment Logistics, Cargo, and Container
Salvage & Towage	Emergency towage, wreck removal, salvage services
Training & Certification	HSC, STCW, HSE courses, international certifications
Digital Platform Operations	Online dealer portal, document upload, license processing
Customer Support & Dealer Portal Access	Client meetings, document processing, and dealer coordination
Central Administration & Finance	Accounting, HR, marketing, and legal affairs

In addition, we plan to use a separate space (approx. 200 m²) outside DMC for an industrial bakery unit , to provide fresh bread and meals at competitive prices to seafarers, labor camps, and maritime crews.

Proposed Use of Space (Model 11):

we believe the following allocation will be most efficient:

1–10	Core marine departments (sales, insurance, class, flagging, repair, logistics, etc.)
10–15	Administrative support, training centre, customer service, and digital platform team

The space office, 35 to 45 meters, is ideal for setting up a fully functional marine business cluster while maintaining an organised and professional environment for both local and international clients.

Strategic Value for DMC:

 Job Creation	Employment of local and expatriate staff (min. 20–30 employees)
 Skill Development	Certified training programs for seafarers and blue-collar workers
 Investment Attraction	Potential partnerships with global maritime organisations
 Enhanced Maritime Services	One-stop solution for vessel owners, operators, captains, and agencies
 Improved Labour Welfare	Affordable food supply for crews and workers
 Efficient Utilisation of Space	Full use of the allocated area for economic and social benefit

Next Steps:

We kindly request your guidance on the formal process for submitting a space allocation request, including:

- Required documentation
- Approval timelines
- Rental terms and conditions

- Any specific requirements for operating as a marine business hub

Please let us know if any additional steps or qualifications are required from our side to qualify for this opportunity.

2	Floor Plan (Model 11 – Staff Accommodation)
3	Annual Development Roadmap
4	Business Plan Summary
5	Training Curriculum Outline
6	Industrial Bakery Production Proposal

 Final Request:

We respectfully request the allocation of Space No. 1 (Model 11 – 800 m²) within Dubai Maritime City, to set up a comprehensive marine business and service centre, and if possible, access to an adjacent 200 m² space for our industrial bakery unit.

This project will bring significant value to DMC by enhancing the cluster with:

- A centralised location for all marine-related services
- A hybrid model combining online and physical operations
- Workforce development through certified training programs
- Affordable catering solutions for crews and workers
- Additional employment and investment opportunities

We look forward to your kind response and cooperation in this matter.

Thank you in advance for your attention and support.

Nematollah Rahnama

CEO – Rahnama Holding Company
